

Crown & Bridge Scanning Workflow

- ☐ Dental Assistant brings the patient to the operatory
- ☐ Doctor anesthetizes the patient
- ☐ Dental Assistant scans the patient's upper and lower quadrant
 - Once taken, save, and then remove the tooth to be prepped so the doctor can easily scan the prep
- ☐ Dental Assistant takes triple tray for the provisional
- ☐ Dental Assistant takes the shade
- ☐ Doctor preps the tooth
- ☐ Doctor scans, reviews, and approves the prep for prep design, margins, draw, and undercuts
- ☐ Dental Assistant makes the provisional
- ☐ Doctor evaluates and cements the temporary crown
- ☐ Dental Assistant cleans the patient and dismisses
- ☐ Dental Assistant fills out the digital Rx form and sends the scan
