

# The Team Approach for Single-Visit Digital Implant Surgery and Immediate Provisionalization

In Association with  
**3Shape**

## Thursday, June 17, 2021

### LEARNING OBJECTIVES

- Utilize digital dentistry to become more profitable
- Understand how digital dentistry can help differentiate and grow your practice
- Facilitate communication and comprehensive treatment planning with all members of the care team

### PROGRAM DESCRIPTION

Digital dentistry is quickly becoming an important factor in our current standard of care. It is changing the economics, efficiencies and quality of dental treatment. It is not an issue of if you're going to adopt it, but when. The question to ask is really, "will you incorporate it soon enough to create a competitive advantage for your practice?" This program will provide surgical specialists with an overview of the technology available now, and for the future, to shape your dental implant practice and provide the confidence needed to help enhance your practice and improve patient outcomes. The digital protocol between the specialist, lab technician and general dentist will be illustrated step by step.
